OBJECTIVE

A motivated BCA student with hands-on skills in Python, SQL, Machine Learning, and data visualization, seeking a data-focused role to apply strong analytical and problem-solving abilities while contributing to organizational goals and growing as a data professional.

TECHNICAL SKILLS

Languages: Python, SQL, C/C++

Python Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn

Machine Learning: Logistic Regression, Decision Trees, Linear Regression, Feature Engineering, Model Evaluation

Tools & Databases: Jupyter Notebook, Excel, Power BI, MySQL

Languages Known: Hindi, English

RELEVANT EXPERIENCE

Data Analytics & ML Trainee — RoyalZ Informatics, Chhindwara

- Completed intensive hands-on training in Python data analysis (NumPy, Pandas, Matplotlib, Seaborn) and machine learning using Scikit-learn.
- Built three end-to-end data analytics projects covering classification, regression, and business analytics on public datasets.
- Practiced the complete workflow: data cleaning, exploratory analysis, model building, evaluation, and visualization.

PROJECTS

Credit Card Approval Prediction

Python (Pandas, NumPy, Scikit-learn, Seaborn) | SQL

- Cleaned and prepared a credit dataset - handled missing values through imputation and encoded categorical variables using one-hot and label encoding.
- Built and compared Logistic Regression and Decision Tree models to predict approvals; evaluated performance using accuracy, confusion matrix, and ROC-AUC.

Restaurant & Food Delivery Ratings Analysis

Python (Pandas, Matplotlib, Seaborn) | SQL

- Analyzed a restaurant ratings dataset using SQL and Pandas to find rating trends by location and cuisine type.
- Created visualizations - rating distributions, location-wise heatmaps, and cuisine comparisons - to highlight top and underperforming segments.

Advertising Campaign ROI Analysis

Python (Pandas, NumPy, Matplotlib, Scikit-learn) | SQL

- Calculated ROI, conversion rate, and cost-per-acquisition across marketing channels from a campaign dataset.
- Built a Linear Regression model to estimate conversions from ad spend and visualized channel performance to suggest budget allocation.

EDUCATION

Bachelor of Computer Applications (BCA) - Pursuing | Makhanlal Chaturvedi National University, Bhopal

Higher Secondary (12th), Mathematics - MP Board | 64%

Secondary (10th) - CBSE Board | 61%

CERTIFICATIONS

- Data Analytics with Python (NumPy, Pandas, Matplotlib, Seaborn) and Machine Learning Fundamentals (Scikit-learn) - RoyalZ Informatics
- Python Programming and C/C++ Programming - RoyalZ Informatics

SOFT SKILLS

Problem-solving • Analytical thinking • Communication • Teamwork • Willingness to learn
